Your Companion to Electronic Medical Practice

ELECTRONIC HEALTH RECORD (EHR)

About Us

Founded in 1999, MDLAND is an innovative healthcare solution provider that is committed to providing highly efficient solutions for the medical community. With the combination of years of experience in Electronic Health Record (EHR), Medical Practice Management and emerging technologies, we're focusing on providing affordable, compatible, interoperable and full data ownership products to physicians. We operate as a HIPAA compliant Application Service Provider (ASP) that manages every aspect of your medical practice. The key features include:

- * **Electronic Health Record (EHR)**
- * **Practice Management**
- * **Electronic Claim Processing**
- * **Patient and Account Management**
- * **Scheduling**
- * **Statistics and Financial Reports**

Electronic Health Record (EHR) is designed by physicians for physicians. The program's intuitive interface transforms every step of your daily patient encounter process into an Electronic Health Record. Built-in and ready-to-use templates reduce malpractice, increase productivity, improve documentation and increase billing revenue. The HIPAA compliant security control provides only the highest level security and confidentiality.

ONE PACKAGE DOES EVERYTHING

- * Electronic Health Record
- * Electronic Claim Processing
- * Practice Management and Office Automation
- * Connectivity to laboratories and other healthcare networks

NO additional software is required to handle office and medical work.

STREAMLINE OFFICE VISIT WORKFLOW

- * Primary / covering physicians, PA / RN all have simultaneous access
- * Immediately send out prescriptions, consultation letters, office visit notes, etc.
- * Supports general practice and specialty
- * One system handles all medical correspondence, letters, reports and images

This program is so easy and intuitive. We have streamlined our office workflow among physicians and staffs in multiple offices and increased productivity. We are operating a paperless office and simply complete the patient's chart immediately after each office visit. I strongly recommend MDLAND to other physicians.
